Summary

I am Saleh. A full-stack web developer and statistics enthusiast. since childhood, I've been programming for fun, and now I'm developing web for almost 6 years. my main fields of working were entertainment and transportation industries, using Django, PHP, R, MySQL, PostgreSQL and etc. Creating Interesting and useful systems is what connects all my interests and experiences.

Education

2015-2018   **M.Sc.**, *Amirkabir University of Technology*, Tehran, *Mathematical Statistics*.

MSc. Thesis

title   **Simultaneous Tests For High Dimensional Datasets**

description   Nowadays emergence of new technologies like DNA Mircro-array has been leaded to creating large scale data, which needs new method to analysis. In my Thesis I investigated a model that works on this settings.

2010–2014   **B.Sc.**, *Allameh Tababaei University*, Tehran, *Applied Statistics*.

BSc. Project

title   **Investigation on Mobile-Bank Service Based on SERVQUAL Model**

Experience

September 2020- December 2020   **Back-end developer**, *DNBuy Co.*, Remote Canada.
Dnbuy is a international domain and hosting provider website based in Canada. My task is to participating to new dnbuy service implementation.
Technologies: `Django, Nginx, MySQL, jquery`, etc.

September 2019- present   **Full-stack developer**, *Abrbar Co.*, Tehran.
Abrbar is a project on transportation. My task is to Implementing restful API which currently uses in both drivers and customers android app and Abrbar dashboard, contains all functionalities on ordering, reserving cargo for drivers, financial management and etc.
Technologies: `Django, DRF, postgresql, Nginx, reactjs, PWA, jquery`, etc.

May 2018- Jun 2020   **Full-stack `django` Developer**, *Boundar Souban Samaneh*, Tehran.
I was responsible for implementing API endpoints and front-end UI for irasography. I've done full implementation of all features for photographer users and admins. Technologies: `django, DRF, postgresql, bootstrap, nginx`, etc.

Just a Project   `Wordpress` **Developer**, ATNA *(Allameh Tabatabei News Agancy)*, Tehran.
website maintenance, including bugs in front-end and implementation of home page slider.
used technologies: `wordpress`, and `jquery, MySQL`

Sep 2015- Nov 2016   `Wordpress` **Developer**, *Allmaeh Tabatabaei University*, Tehran.
Development of `atue.ir` website and shop and bank gateway, and implementing new features like `woostat` plug-in.
Technologies: `Wordpress, MySQL, Woocommerce`
